# Day 4 Exercise

Practice 1

1. Import the `cancer.sav` dataset, using the `haven::read_spss()` command.
2. With the `cancer.sav` dataset imported, reproduce this figure as precisely as possible.

Hint: don't forget, you can consult Google and `vignette('ggplot2-specs')`

Practice 2

1. Make a scatterplot with some of your ABCD data.
2. Make the figure publication ready by...

   - Changing the theme to have a black background
   - Making the whole figure greyscale
   - Renaming the axes and legend

3. Export your final product as a `.png` file.
